# Super Magazine <span style="color:gray">Wordpress theme</span>

## How to install

Open 'Theme' folder. Move the 'mymagazine' folder to /wp-content/themes/ and activate it on your Wordpress installation.

In the Theme folder you'll find two plugins that you need to move to /wp-content/plugins.

Activate both plugins.

<span style="color:red">IMPORTANT:</span> Activate 'popularitycontest' first.

## Configuring the theme

After the theme activation, you'll find a new page under the Design menu. The new page is 'Super Magazine Options'.

Use that page to configure all aspects of your theme.

## Using the theme

This theme uses two custom fields.

- breakingnews
- image

Example of use:

Create a post for the featured category. Upload one image using the Wordpress uploader. Enter the the full path for the image (ie. http://www.website.com/image.jpg) on the breakingnews custom field.

That's it. You don't need to worry about resizing the image. The theme does it all by itself.

If it is a normal post, just replace 'breakingnews' by 'image'. The process is exactly the same.
